

## Easter Crafts

To make an Easter basket similar to the one in the picture, you will need:

- Coloured felt
- Basket template
- Hot glue gun
- Scissors

Procedure:

1. Print the template
2. Cut out the template. Lay the template pieces on top of you felt. Use pins to hold the template in place.
3. Draw around the template with a pencil.
4. Remove the template and cut out all your felt pieces.
5. To make the basket more rigid and resistant, use double layers of the pieces.
6. Take to the bottom pieces, got around the edge of one piece with hot glue, press the second piece on top and wait for the glue to seal.
7. Take two of the long edges of the basket and glue them together. Then add hot glue to one long side of the base and position the side on the base. Hold in place until the glue has sealed.
8. Continue this process with the remaining side pieces until you have completed the basket.
9. Decorate the sides of the basket with flowers, rabbits, chicks or any other Easter themed decorations.
10. Now you are ready to go hunting for Easter eggs ;)
